ABOUT US

Since its inception in 1975, Bayçelik has been dedicated to establishing industry leadership by taking confident steps towards branding. We strive to achieve the best product and highest quality service by prioritizing customer satisfaction, with the production we carry out in our modern facility.

With all care, we selectively source sunflower seeds from the most fertile plains in our country to deliver quality to our valuable customers. Our facility boasts an annual processing capacity of 15,000 tons of sunflower seeds, with ongoing efforts to increase this capacity. We attentively process the sunflower seeds obtained from our farmers and prepare them for roasting.

since 1975
